[WiFi pairing your WiFi EOS camera with EOS Utility 3.0](#)

WiFi pairing is the process of ensuring that your computer is able to recognise your camera on a network and connect to it. It is necessary to carry out the WiFi pairing process for each camera, and each network you will use. WiFi pairing is like the pairing process to get a mobile phone to pair with your car using Bluetooth. A camera can pair with multiple different networks and devices, and store them. It will only operate with one device at a time.
