grep - Wikipedia

grep is a command-line utility for searching plain-text data sets for lines that match a regular expression. Its name comes from the ed command *g/re/p* (globally search a regular expression and print), which has the same effect: doing a global search with the regular expression and printing all matching lines.

FREE SOFTWARE FOR DOS UNIX - reimagery.com

The programs featured here are DOS ports of Unix originals, or of the Free Software Foundation's tools for the GNU Operating System. Programs from the GNUish Project, and some others, run in 80x86 real mode (16-bit) and work on 80286 or older CPUs (and almost any DOS).

Levenshtein distance - Wikipedia

There are other popular measures of edit distance, which are calculated using a different set of allowable edit operations. For instance, the Damerau Levenshtein distance allows insertion, deletion, substitution, and the transposition of two adjacent characters;
