Climate change in the United States - Wikipedia

Because of global warming, there has been concern in the United States and internationally, that the country should reduce total greenhouse gas which is relatively high per capita and is the second largest in the world after China, as of 2014.

The Effects Of Climate Change | WWF

Climate change is having serious impacts on the world's water systems through more flooding and droughts. Warmer air can hold a higher water content, which makes rainfall patterns more extreme. Warmer air can hold a higher water content, which makes rainfall patterns more extreme.
