The differential diagnosis of ILS includes acute and organizing pneumonia (if infected) and large cyst CPAM (type I), particularly because approximately 25% of large cyst type CPAMs have a systemic arterial supply and, less frequently, abnormal venous connection. Both of these have a normal bronchial connection to the involved lung. [Differential Diagnosis in Pediatric Echocardiography ...](#)

Dr. Jean Lintermans came to Seattle in 1962 from his general pediatric residency at the University of Iowa. He worked with us in clinical pediatric cardiology and in our animal physiology laboratory for the next three years. [A differential diagnosis in pediatric echocardiography ...](#)
