Humanities and social science perspectives on health and medicine equip students to address important topics, such as the ethics of biomedical research; the nature of medical discovery; the relationships among race, gender, and health; the global impact of public health issues; and the cost of health care delivery. Understanding these and related issues is essential to developing informed, thoughtful, and ethically enlightened leaders in the fields of health and medicine.

Bachelor's in Health and Society DCU

With a particular emphasis on health action in the everyday world, you will participate in a voluntary community project in Year One. In Year Two you will design and implement a small health campaign (working with fellow students). In Year Three you will conduct a health action project as part of a final dissertation.
