[Understanding how references and labels work - TeX](#)
Whenever you use `\label`, writing of this information to the `.aux` is actually delayed until page shipout. The reason for this is because the system is set up that way so that a single can be used to reference the "title" (usually in the form of a number) as well as the location (page) within the document.

[LaTeX/Labels and Cross-referencing - Wikibooks](#)

For example, if you put a label after closing a figure, the label will still say "figure n", on which n is the current section number. `\nameref [edit]` The `hyperref` package also automatically includes the `nameref` package, and a similarly named command.
