RELIABILITY OF RADIOACTIVE TRANSFER MODELS Edited by G. DESMET Commission of the European Communities, Brussels, Belgium ELSEVIER APPLIED SCIENCE

Reliability of Radioactive Transfer Models | SpringerLink

Models are imperfect means of representing environmental transfer processes, and it is essential to know the reliability which can be associated with the predictions of these models for each and every assessment situation. Such information is necessary in order to establish confidence in model predictions and, in particular, to allow adequate safety margins to be set in the design of nuclear
